Servlet Program to Display 'Hello, World!' in Browser

AIM:

To write a servlet program that prints "HelloWorld!" and displays it in the browser when accessed.

CODE:

```
package com.karthick.servlet;

import java.io.IOException;
import java.io.PrintWriter;

import javax.servlet.ServletException;
import javax.servlet.annotation.WebServlet;
import javax.servlet.http.HttpServlet;
import javax.servlet.http.HttpServletRequest;
import javax.servlet.http.HttpServletResponse;

/**
 * Servlet implementation class HelloWorld
 */
@WebServlet("/HelloWorld")
public class HelloWorld extends HttpServlet {
    private static final long serialVersionUID = 1L;

    /**
     * @see HttpServlet#HttpServlet()
     */
    public HelloWorld() {
        super();
        // TODO Auto-generated constructor stub
    }
}
```

```

/**
 * @see HttpServlet#doGet(HttpServletRequest request, HttpServletResponse response)
 */
protected void doGet(HttpServletRequest request, HttpServletResponse response) throws
ServletException, IOException {
    PrintWriter p = response.getWriter();
    p.println("Hello World!!!");
}

/**
 * @see HttpServlet#doPost(HttpServletRequest request, HttpServletResponse response)
 */
protected void doPost(HttpServletRequest request, HttpServletResponse response) throws
ServletException, IOException {
    // TODO Auto-generated method stub
    doGet(request, response);
}
}

```

OUTPUT:

The screenshot shows the Eclipse IDE with the following details:

- Project Explorer:** Shows a project named 'Karthick' with a 'src' folder containing 'HelloWorld.java', 'SignUp.java', 'SignIn.java', 'UserValidation.java', and 'UserDetails.html'.
- Code Editor:** Displays the 'HelloWorld.java' file. It shows the package declaration 'package com.karthick.servlet;', imports for 'java.io.IOException', 'java.io.PrintWriter', 'javax.servlet.ServletException', 'javax.servlet.annotation.WebServlet', 'javax.servlet.http.HttpServlet', 'javax.servlet.http.HttpServletRequest', and 'javax.servlet.http.HttpServletResponse'. The class 'HelloWorld' extends 'HttpServlet' and implements the 'doGet' method, which prints 'Hello World!!!' to the response writer.
- Console:** Shows the output of the application, displaying 'Hello World!!!'.
- Task List:** Shows a task for 'HelloWorld.java' with the message '// TODO Auto-generated method stub'.

**RESULT:**

Thus, the Servlet Program to print/display Hello World in the web browser is successfully Implemented.
